

Talis Decisions: Administration

Duration: 1 Day

Cost: £300

Introduction

Talis Decisions is powered by Business Objects Enterprise XI, a market leading business intelligence tool. This course is for staff responsible for the implementation and management of the system. The course introduces the architecture and general configuration of the product. The course also covers the web-based system management tool and includes backing up the system database and general troubleshooting approaches.

Attendees should have some experience of InfoView and Web Intelligence before attending this course. Customers booking both this course and the InfoView and Web Intelligence course at the same time can do so for a reduced price.

Prerequisites

Attendees should have:

- Attended the **Talis Decisions: InfoView and Web Intelligence** course
- Familiarity with the Windows environment, including mouse skills
- Ability to open and close, create and save windows documents, and basic familiarity with web browsers
