

Talis Decisions: InfoView and Web Intelligence

Duration: 1 Day

Cost: £300

Introduction

Talis Decisions is powered by Business Objects Enterprise XI, a market leading business intelligence tool. This course is for people who need to query Talis Alto to report and analyse data and who have little or no experience of using Business Objects software. It focuses on introducing the functionality of the web interface including creating, formatting and distributing reports.

Note that this course is a prerequisite for anyone who wishes to attend the Talis Decisions: Administration Course. Customers booking both courses at the same time can do so for a reduced price.

Prerequisites

Attendees should have:

- Familiarity with the Windows environment, including mouse skills
- Ability to open and close, create and save windows documents
- Basic familiarity with web browsers
